

MPL 20 Lux

Order Picker

Versatile order picker

Excellent forklift for quick and efficient transportation of two pallets and three roll cages on the forks after each other. MPL 20 Lux are available in many variations for many different storage needs. Only with initial lift as only an order- and transport forklift or with mast for stacking up to a height of 2500 mm. The forklift can also be equipped with walk side drive and forklift controls on the side for a more efficient order picking.

Efficiency The forklift can be equipped with several different fork lengths for both one pallet but also with long forks to transport two pallets or three roll cages. The location of the wheels is adjusted for the handling required, at the same time the turning radius and stability is optimized according to the situation.

Step-in height What characterizes the MPL is the low step-in height and that one can easily go in and out of the truck on both sides. An essential part of an efficient order picking.

Specifications
