

ABEKO SAR 20N
LOW LIFTER

Small, flexible and compact truck. The perfect truck for driving long stretches. The truck is narrower than a standard pallet and has a very low centre of gravity thanks to the battery's placing. Low step-in height and you are protected all the time when standing on the truck.

Ergonomic 45 degree driving position for optimal operation forward/reverse. Very good all-round view. In the same way as other Abeko warehouse trucks, this is also equipped with a powerful 3 kW AC motor. Speed approx. 12-14 km/h.

CHARACTERISTICS

- Lifting capacity: 2000 kg
- Low lifter
- 3 kW drive motor AC
- Battery capacity 465/620 Ah
- Battery space with rollers
- Adjustable and vibration damped control console and steering unit
- Paper tray, pen holder and mug holder
- "Speed reduce" - The driving speed drops continuously in turns
- "Pulsating brake" - Minimise the risk for the drive wheel locking or separating from the surface when braking
- "LSC" - Lowering Speed Compensation The truck's lowering speed is set automatically depending on the tonnage on the forks
