

SWR 33T

Low lifter

Extreme performance with dual 6,4 kW motors - an investment that pays of

The Abeko SWR 33T is primarily used for rapid and heavy goods handling. With double drive motors, loads of up to 3300 kg can be transported as fast as 18-20 km/h. Thanks to the damped motor suspension, the truck always has the optimal grip and braking capacity. The truck is usually equipped with 2400/3600 mm long forks for handling two to three pallets. The driver has a high position for the maximum supervision of load and surroundings.

Workplace Easy to find a good working position. Both steering wheel, floor, seat and steering controls are adjustable. The driver is also protected by a robust door.

Robust SWR 33T is designed for rough handling. Every detail is optimized for durability and low maintenance costs.

Controls Equipment options are many. Driving by hand controls or foot pedals.
